Change the question, measured

Day 10: read the question, then expand it with a reviewed map.

WHERE THE WORDS DON'T MEET

BM25, Day 01

"How much time off do new dads get?"

BM25 searches for

`much time off new dads get`

×

the answer says

`primary caregivers … leave`

words in common: none

the map adds the documents' words:

`+ caregivers leave`

weighted fusion

#3 → #1 ✓

the default retriever, the weighted fusion

THE QUESTIONS BEHIND IT

v1: 81 queries, 6 touched

2 ranks up

0 down

vs Day 09's accepted baseline

41 NEW QUESTIONS

written and committed first

0 moved

1 touched

vs the same fusion without the map

DECISIONS, CRITERIA SET IN ADVANCE

the map in the default retriever	not adopted
the fixed names rule	not adopted

a map fixes the gaps someone recorded, and only those

Read the question first

Query understanding: what each part of a question allows.

SENTENCES

Day 06 refused it

"...a virus. Should I switch it off?"

✓ "Should" starts a sentence: not a name

NAMES AND PLACES

Day 06 refused it

"...per night in Tokyo?" Tokyo: a city

✓ a source says "any city not listed"

VALUES

the guard checks

"...a receipt for a USD 40 dinner?"

✓ USD 40 decides it: any rewrite keeps it

ROUTE

30 of 30 lookups

USD 1,000 · #it-help

✓ an exact value: never rewritten

THEN, FOR QUESTIONS ONLY: THE MAP

`question + caregivers leave` → BM25

`question as asked` → dense + the gate

→ weighted fusion

append, never replace; chosen on dev, committed first

When not to rewrite

Three ways a change to the question goes wrong.

MATCHED WORD BY WORD, THE MAP DRIFTS

`for → reimbursed` `it → turn off` `one-time → leave`

"Can I give my one-time code to someone from IT?"

`+ leave remotely remote turn off`

#1 → #2 ×

11 of 29 new questions touched instead of 1

TRUE IN GENERAL, WRONG FOR THE QUESTION

`dinner → meals`

"Do I need a receipt for a USD 40 dinner?"

needs "every expense over USD 25", not the meal limit

#1 → #2 ×

A GUARD CHECKS FORM, NOT MEANING

rewrites written by hand

drops "USD 40"	discarded ✓
Tokyo → Japan	discarded ✓
new dads → secondary caregivers	kept ×

a dad can be the primary caregiver: 16 weeks, not 6

NEVER REWRITE

exact values · who is asking: permissions come from the login

Fix a rule, follow its questions

Day 06's names rule, fixed, on 41 new questions.

SENTENCE STARTS SKIPPED, PLACES TYPED

dense gate 0.62 first

Day 06's rule — answerable kept: 22 of 29

unanswerable refused: 6 of 12

fixed rule — answerable kept: 26 of 29

unanswerable refused: 5 of 12

+ Berlin, Paris, "Do...?", "Who...?" – "Does...?" was refused by accident

THE 7 QUESTIONS IT STOPPED REFUSING

- ✓ Tokyo, the virus question, Berlin, register the trip — 4 correct
- × Paris: London's row — wrong
- × stolen phone: "report it straight away" — wrong
- × changing teams: a cited non-answer — answered

a lifted refusal hands the question to the next stage

THE BAR, SET IN ADVANCE: LOSE NOTHING

4 more answerable kept, 1 fewer refusal: not adopted

the new test split decided twice: now it's used too

next: Day 11, the section next door
