Found isn't answered

Day 12: grade the answers, and say where each one was lost.

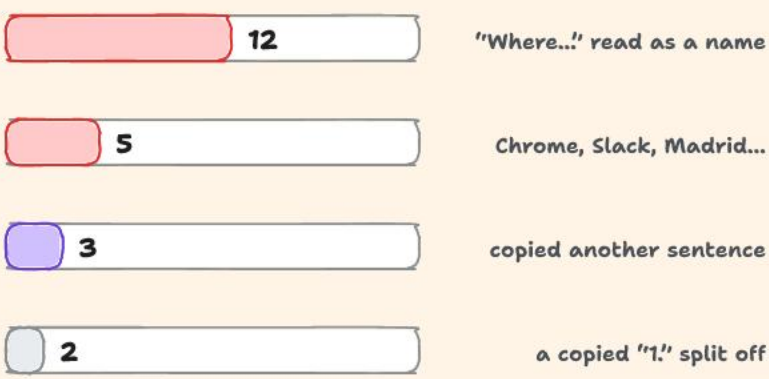

52 NEW QUESTIONS, THE CURRENT PIPELINE

written first

retrieval found every answer; users got 30 right ones

WHERE THE OTHER 22 WERE LOST

retrieval lost none of them

A GRADE THAT NAMES THE STAGE SAYS WHAT TO FIX

here: a refusal rule first, then the reader

a retrieval metric stops at the context; people read answers

Grounded isn't correct

One grade, six parts, written down before the test.

THE RUBRIC

correct	every fact in the answer	**refused by**	gate, names, reader, check
context	was the answer sent?	**cited**	does it cite the answer?
grounded	words in the cited source	**stage**	where it was lost

facts, labels and stages come from the labelled questions

"HOW MUCH TIME OFF DO NEW DADS GET?"

four replies

	grounded	cites it	correct
the reader copies a phased return	✓	✗	✗
a faithful paraphrase "16 weeks ... 6 weeks"	✓	✓	✓
gpt-6-luna (Day 06) "Secondary caregivers: 6 weeks"	✓	✓	✗
a changed number "18 weeks": blocked		never shown	

the policy is gender-neutral: a dad who is the main carer gets 16 weeks

A GROUNDEDNESS SCORE PASSES 3 OF 4

two of those are wrong: keep correct and grounded apart

grade the grader: 177 of 180 agree with a careful reading

the 3 misses: lists of table rows that include the right one

Fix one rule, meet the next

Day 10's names rule, judged by answers on 76 new questions.

A SENTENCE'S FIRST WORD, READ AS A NAME

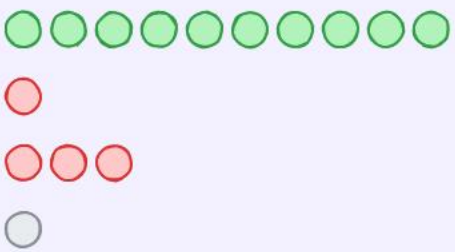

"It's my first day. Where do I pick up my laptop?"

✗ Day 06's rule: no source mentions "Where" → refused

✓ Day 10's rule: "Collect your laptop and security badge..."

15 OUTCOMES CHANGED

of 76 new questions

10 refused → correct

1 refused → wrong

3 not answerable → answered

1 near tie, set apart

the new wrong answers are the reader's: the old rule hid them

VALUE, SET IN ADVANCE

`correct +1 · refused 0 · wrong -2`

10 × (+1) + 4 × (−2) = +2: adopted

by the smallest margin: counting the near tie, +0

if wrong costs 1: +6 · if it costs 3: -2

a decision needs a cost for wrong answers, stated first

next to fix: the reader

Every recorded failure, a test

29 cases from Days 01–11, run on every push.

FIXED

9

must stay fixed

new dads: in the top 3

GUARD

13

must always hold

no managers-only chunk for alice

KNOWN

7

pinned as it fails

a copied "1." is blocked

HOW A KNOWN CASE WORKS

the failure still happens	→	the test passes
it stops, or changes shape	→	the test fails, and says why

fixed on purpose? move it to fixed. never delete it

BEFORE YOU TRUST AN ANSWER METRIC

grade refusals too	refusing everything has no wrong answers
name the stage	so the grade says what to fix
check the grader	against people, per generator
state the cost first	of a wrong answer vs a refusal
pin failures as tests	fixed, guard or known
